Terms & Conditions for the Georgia Power Company Business and Residential Electric Vehicle Charger Rebate Programs

The Rebate Programs:

Georgia Power is offering rebate programs to help Business and Residential Customers cover some of the costs associated with installation of electric vehicle (EV) chargers. Georgia Power Customers who install a Level 2 (208/240v) charger may qualify for a rebate for each charger installed. The rebates are available for installations completed by December 31, 2015. A completed Electric Vehicle Charger Rebate Request Form along with a copy of the installation invoice must be submitted within sixty (60) days after the vehicle charger has been installed. Georgia Power reserves the right to cancel or modify these rebate programs at any time in its sole discretion.

The Rebates:

Program:	**Rebate:**	**Rebate Available:**
Business EV Charger Rebate	$500 per unit	11/10/2014 – 12/31/2015
Residential EV Charger Rebate	$250 per unit	1/1/2015 – 12/31/2015

Charger Eligibility Restrictions:

- Must be a Level 2 (208/240 volt) charger.
- Must have a dedicated 40 AMP circuit.
- Must be new (not used, refurbished, rented, etc.) and purchased by the customer on or after November 10, 2014. Chargers gifted or won as part of a raffle or giveaway are not included.
- Rebate paid on each charger installed.
- There are no manufacturer, make or model restrictions, so long as the above requirements are met. Visit Electric Vehicle Service Equipment (charger) manufacturers for a list of charger manufacturers.
- All city, county, or state government, property owner or homeowner's association, rules, codes and regulations must be complied with during installation of the EV charger. All necessary permits must be obtained prior to installation. Level 2 charging occurs at a higher voltage rate than the Level 1 (120 volt) charger, and as a result, an inspection and permit are likely to be required by the city or county where the business or residence is located. Participating EV charger installers or other qualified independent electricians can identify what permitting and inspections may be required. Customers are not required to use a participating EV Charger Installer to be eligible for the Business or Residential Electric Vehicle Charger Rebates.

Customer Eligibility Restrictions:

- Must be a Georgia Power customer.
- Eligible customers must be the property owner, or have the express permission of the property owner, to install the EV charger.
- **Business Rebate Only:**
    - Program open to all business customers regardless of electric service rate.

    - Business customers include, but are not limited to: retail, industrial, office buildings, churches, and multi-family residences.
    - Third party vendors or business customers engaged in the electric vehicle charging business, and new car dealerships are not eligible for the rebate.
- **Residential Rebate Only**:
    - Program open to all single family residential customers regardless of electric service rate.
    - Residential customers do not have to be on the Plug-In Electric Vehicle (PEV) Rate in order to be eligible for the rebate.

All electric vehicle chargers installed under these programs are subject to visual verification by the Georgia Power Corporate Compliance Organization (GPCCO). If your EV charger installation is selected for a field audit, you will be contacted by a GPCCO representative to schedule an appointment. By signing and submitting the Rebate Request Form the customer agrees to provide a GPCCO representative reasonable access to the installation site during normal business hours. If the field audit discovers that the EV charger has not been installed, the rebate will not be paid and the customer may be billed for repayment of the rebate to Georgia Power if the rebate has already been issued.

Georgia Power's liability and responsibility in connection with the Electric Vehicle Charger Rebate Programs shall be strictly limited to the making of certain rebate payments for eligible equipment, and Georgia Power does not make, will not provide and specifically disclaims any representations, warranties, covenants or guaranties whatsoever, express or implied, in connection with the electric charger or the Program itself, including, without limitation, those regarding merchantability or fitness. Warranties with respect to the electric vehicle charger are strictly manufacturer's warranties, and customers participating in the program shall not make, nor have the right to make, any claims against Georgia Power relating to any such warranty. Georgia Power shall in no way be liable or responsible for any equipment installed by, or for any act or omission of, any other entity or individual, including, without limitation, equipment manufacturer, any electrician, technician, or other service provider.

Customers participating in the Electric Vehicle Charger Rebate Programs may be contacted to participate in Georgia Power's data collection on EV charging practices in order to better understand EV drivers' charging practices, improve EV services, and encourage greater EV deployment. For example, Georgia Power is interested in collecting information on how many chargers are installed at workplaces and the number and frequency of EV drivers using workplace chargers. Participation is voluntary and does not affect rebate eligibility. Additional information available on Georgia Power's Electric Vehicle website.

Rebate Submissions:
