TERMS AND CONDITIONS

Applicant's permission to build, maintain and enjoy a structure or other improvements on Georgia Power property (fee or flood rights) is subject to the terms of Applicant's lease or license and contingent upon Georgia Power's issuance of a permit in its sole discretion. Any permit issued by Georgia Power will be pursuant to and consistent with the applicable Programmatic General Permits issued by the U.S. Army Corps of Engineers (USACOE). Applicant shall obtain any additional permission or permits as required by law.

No structure may be placed on Georgia Power property without a valid Georgia Power permit card posted and clearly visible from the lake. Permits are no longer valid after the completion date noted on the permit card. Applicant is responsible for contacting Georgia Power in order to request a permit extension or reapply for another permit if the project exceeds the completion date. Applicant acknowledges that any changes to the Work made after approval of this permit must be approved by Georgia Power.

All structural and electrical work (hereinafter the "Work") must comply with generally accepted industry practices and sound engineering principles for shoreline construction and wiring consistent with the National Electric Code and local building codes. Applicant shall ensure that, where required by law, work is performed by a licensed professional. Any inspection by Georgia Power of the Work is limited to conformity with shape, size, location and aesthetic requirements. Georgia Power does not inspect the Work for compliance with electrical codes or structural integrity.

Applicant represents that he or she has read and understands Georgia Power's Shoreline Management Construction Guidelines.
