

Customer-Connected Solar Program

The Customer-Connected Solar Program allows you to partner with any developer to build a solar facility on or adjacent to your property. We'll purchase 100% of the energy generated and retire the Renewable Energy Credits (RECs) associated with your solar facility on your behalf, so you can claim the renewable benefits.

Reduce your electric-based carbon footprint with on-site solar.

We'll accept applications for this program until the 25 MW AC portfolio is filled.

Program benefits:

- ▶ Participation can help meet sustainability, green energy, or carbon reduction goals
- ▶ Long-term contracts (up to 30 years) guarantee fixed solar power purchase prices
- ▶ Payments are made directly to the customer
- ▶ 26% Federal Tax Credits for 2022
- ▶ Georgia Power retires RECs on the customer's behalf

Program requirements:

- ▶ Solar facility must be located on or adjacent to your property
- ▶ Projects can be sized up to 3 MW AC, but must not exceed 125% of your peak demand for 12 months prior to application
- ▶ One application per customer account and one application per parcel of land

Participate by:

- ▶ Owning the solar facility
- ▶ Leasing the solar facility
- ▶ Leasing the production of the facility through a Solar Energy Procurement Agreement (SEPA)

For all program details and additional requirements, please visit georgiapower.com/customerconnectedsolar.

"Aflac is excited to participate in the Customer-Connected Solar Program (CCSP). This program will help us reach our Carbon Neutral and Net Zero goals as we work to transition to a lower carbon economy. We're happy we receive the monthly payment for the energy from our solar facility and have our RECs retired annually by Georgia Power."
