

**AMENDED POST-CLOSURE CARE PLAN
331-3-4-.10(7) AND 40 C.F.R. PART 257.104
PLANT WANSLEY ASH POND 1 (AP-1)
GEORGIA POWER COMPANY**

The Federal CCR Rule, and for Existing Surface Impoundments where applicable, the Georgia CCR Rule (391-3-4-.10) address the requirements for post-closure care of a CCR unit undergoing closure. The CCR surface impoundment known as AP-1 located on Georgia Power Company's Plant Wansley property was originally intended to be closed in place, necessitating preparation of a written post-closure care plan per 391-3-4-.10(7)(g) and 40 C.F.R. § 257.104. The post-closure care plan was generated and provided as required, a copy of which was also posted to the Operating Record and to the appropriate publicly available website. Since the closure strategy has been changed to closure by removal, such a post-closure care plan will no longer be required.

Plant Wansley's AP-1 currently has a groundwater monitoring well network that will continue to be sampled for a minimum of 5 years after the completion of removal of CCR.

I hereby certify that this amended post-closure care plan has been prepared in accordance with the requirements of 40 C.F.R. § 257.104.
