

Take a Look at Georgia Power's Renewable Resources List

Georgia Power's Green Energy program is certified Green-e Energy™ by the Center for Resource Solutions, the nation's leading independent certification and verification program for renewable energy. As a part of Georgia Power's certification, we annually publish a Product Content Label detailing the generation mix for Georgia Power's Green Energy program:

Product Content Label Green Energy

Period Covered: 2010 - 2011

This product is sold in 100 kilowatt-hour blocks.

The product is made up of the renewable resources listed below.

Green-e Energy Certified New Renewables in Green Energy:

Resource Type	Green Energy Standard Percent		Green Energy Premium Percent		Generation Location
	2010	2011	2010	2011	
Biomass (Landfill Gas)	96.1%	100.0%	59.7%	50.0%	Southeast
Solar	0.0%	0.0%	36.4%	50.0%	Georgia
Wind	3.9%	0.0%	3.9%	0.0%	Missouri
Total	100.0%	100.0%	100.0%	100.0%	

NOTES:

- 2011 figures are prospective and reflect the power contracted to provide to customers. Actual figures may vary due to resource availability. The actual 2010 resource mix is reported above.
- New renewables come from generation facilities that first began commercial operation on or after Jan. 1, 1997.
- For comparison, the current average mix of resources supplying Georgia Power customers includes: Coal (67 percent), Nuclear (21 percent), Natural Gas and Oil (10 percent), and Hydroelectric (2 percent). (Generation mix as of Dec. 31, 2010)
- The average home in the United States uses 900 kilowatt-hours per month. (Source: U.S. EPA)
