**Notes:**

Prior versions of the 810 utility invoice always contained a positive amount in SAC05 and used the SAC01 element to indicate if the amount should be added or subtracted to calculate the total invoice amount.

As a result of a clarification provided by X12F and subsequent modification of the UIG guidelines, the above practice has been changed. If the amount in SAC05 should be subtracted from the invoice total, the minus sign will be sent.

**MODIFICATIONS TO 4010 SPECIFICATIONS AND SAMPLE INVOICE:**

In order to provide more detailed billing and usage information for some of our customers, Southern Company Services (Alabama Power Company, Georgia Power Company, Gulf Power Company, Mississippi Power Company, and Savannah Electric and Power Company) implemented a new 810 map effective with invoices sent March 17, 2000. This new map will include **additional** PID segments (version 4010).

The literals, descriptions and values will always be in fixed positions within the PID05. The literal "Usage Info." or "Meter Info Desc." will always be in positions 1-19. The reading type description will be in positions 20-45 and the actual value in positions 46-60. The value will be stated with ten (10) digits to the left of the decimal and four (4) digits to the right of the decimal.

**SAMPLE INVOICE (VERSION 4010) INCLUDING CHANGES MENTIONED ABOVE:**
