

## Make Ready Application Checklist

### Business Site Information

---

- Georgia Power account number
- Business Name
- Site/Customer Address, City, Zip Code
- Customer Contact Name & Title
- Customer Contact phone number
- Customer Contact email address

### Type of Charger

---

- How will the chargers be used (Public, Employee, Customers, Fleet, etc.)?
- Is this request for on-road EV charging or off-road charging (i.e Forklifts)?
- For on-road charger ports - what is the total # of vehicle parking spots needed for charging?
- For off-road charger ports (i.e. forklifts), how many charger connections are needed?

### Site Specification

---

- Is this an existing property or new construction?
- If new, what is the current stage of construction?
- What type of property/facility is this?
- How many electric vehicle charging ports are currently installed at this facility?
- Where would you like these chargers to be installed (Surface lot, Parking Deck, Inside Warehouse)?

### Project Assessment

---

- Desired installation time frame?
- Has a site assessment by a certified electrician been performed to check electrical panel capacity?
- Is the existing panel capacity adequate to support the # of chargers being added?
- What voltage is the power source? (i.e. 3Phase 277/480, 1Phase 120/240, 120/208)
- Have you chosen an electrician to perform the work and have they given you a proposal to do the charger installation?
