

Build smart and save more

Get 50% more in new construction lighting rebates for a limited time

Now through November 30, 2025, take advantage of the **New Construction Lighting Bonus** from Georgia Power. For a limited time, you can receive 50% more in rebates for qualifying energy-efficient lighting installations in new construction or major renovation projects.

A bigger bonus for a longer time period

Not only are we increasing the rebate offer for new construction lighting projects, we're also extending the eligibility period. If you've installed eligible equipment within the past 180 days, you can apply for the rebate bonus.

Why participate in the Commercial Energy Efficiency Program?

If you've built or upgraded your facility this year, you may be eligible to earn 50% more in new construction lighting rebates. The rebate bonus can help offset project costs now and the upgraded equipment can lower operating costs for years to come. Participate before the bonus deadline to help further reduce your return on investment period and improve project payback.

Eligibility

To take advantage of the **New Construction Lighting Bonus**, your facility must fall into one of two categories:

- ▶ Newly constructed commercial building
- ▶ Existing building undergoing major renovations

Qualifications

- ▶ Applications must be submitted through the Commercial Rebate Application Center by November 30, 2025.
- ▶ Rebate payments will be issued once the project installation is completed and all close-out documents are received. Projects must be complete by November 30, 2025, to qualify.
- ▶ Installations completed more than 180 days before the application is submitted are not eligible for the rebate.
- ▶ Application and close-out documents received after the offer deadline will be processed based on the existing rebate standards.
- ▶ Distributor Instant Rebates applications are not eligible for the rebate increase.

Submit your application through the
Commercial Rebate Application Center
by **November 30, 2025**.
