Re: Georgia Power Plant Kraft Low Voltage Switchyard
Polychlorinated biphenyl (PCB) Assessment and Remedial Action Report
Port Wentworth, Chatham County, Georgia
155 Crossgate Road, Port Wentworth, Georgia 31407

Dear Mr. Mitchell:

This letter is written in response to the above referenced report concerning the expedited approved cleanup of PCB contamination at the Plant Kraft Low Voltage Switchyard located at 155 Crossgate Road, Port Wentworth, Georgia. The Environmental Protection Agency has reviewed the PCB Assessment and Remedial Action Report, October 2017 (Project No. 1200-900-132) prepared by SBX Technologies, and submitted to the EPA.

Based on the information contained in this report, it appears that the cleanup and removal was completed in accordance with the work plan, approved pursuant to 40 C.F.R. § 761.61(a). No further cleanup or land use restrictions are necessary at this time. If new or previously unavailable information reveals that PCB contamination remains on site which poses a threat to human health and/or the environment, additional investigation and remediation may be necessary.

The EPA appreciates the cooperation of Georgia Power in this matter and the efforts made to address PCB contamination at the site. If there are any questions, please contact Edmond Burks at (404) 562-8587 or burks.edmond@epa.gov, or Ken Feely at (404) 562-8512 or feely.ken@epa.gov.

Sincerely,

Meredith C. Anderson, Chief
Materials and Waste Management Branch
Resource Conservation and Restoration Division

USEPA Region 4
Atlanta Federal Center
61 Forsyth St. SW
Atlanta, GA 30303-3104

**RE: PCB Assessment and Remedial Action Report
Georgia Power Plant Kraft Low-Voltage Switchyard
Port Wentworth, Chatham County, Georgia**

Dear Mr. Feely:

Georgia Power has completed a cleanup under the 40 CFR 761.61(a) protocol at Georgia Power's Plant Kraft Low-Voltage Switchyard. During the initial retirement investigation, sampling results indicated PCB impacts to soil greater than 50 mg/kg.

The remediation was completed through excavation of soils and concrete containing PCBs at concentrations equal to or greater than 1 mg/kg per the guidance. Attached please find a digital copy of the remediation report for the work conducted at this site that includes: 1) A short narrative of site activities; 2) Tabular summaries of characterization and confirmation sampling analytical results; 3) Figures showing the excavation extents, sampling locations and results, and; 4) Copies of disposal manifests.

Georgia Power appreciates your attention to this matter. Should you have any questions, comments, or require additional information, please contact me at (404) 506-6235 or Brett Mitchell at (770) 601-4260.

Sincerely,

A handwritten signature in blue ink that reads "Lea Millet".

Lea Millet
Remediation Team Leader

Section 1

Introduction

SBX Technologies, LLC (SBX) was retained by the Georgia Power Company (GPC) to complete and document the site investigation for the presence of polychlorinated biphenyls (PCBs) in soils at a retired switchyard site located at Georgia Power Company Plant Kraft on Crossgate Road, Port Wentworth, Chatham County, Georgia. GPS coordinates for the location are latitude: 32.148777, longitude:-81.145550. A map showing the location of the Plant Kraft Low Voltage Switchyard (Switchyard) is presented in Figure 1, Site Location. An aerial photograph of the substation is shown in Figure 2, Aerial Photograph. Photographs of the substation area are presented in Appendix A, Photograph Log.

SBX conducted the PCB site investigation in general accordance with the Georgia Power Company Sampling and Analysis Plan (SAP) for Assessment at Georgia Power Substations. The SAP was developed in accordance with 40 CFR Part 761, Polychlorinated Biphenyls (PCBs) Manufacturing, Processing, Distribution in Commerce, and Use Prohibitions and applicable requirements in the Georgia Hazardous Sites Response Act (HSRA). The SAP presents GPC's sampling rationale and procedures for sample collection, decontamination procedures, sample management, analytical methods, quality assurance/quality control measures and health and safety requirements. The objective of the SAP is to provide a consistent methodology to assess both active and retired Georgia Power substation sites for the presence or absence of PCBs due to the possibility of undocumented, historical spills of dielectric fluid(s).

This investigation report and the SAP incorporate GPC's current assessment and cleanup procedures to address possible soil impacts, as these are the primary media where PCB impacts are typically found in a substation site. Surface gravel is the predominant surface dressing at GPC substation sites and is not sampled as part of the methodology presented in this document. Surface gravel is addressed (if necessary) based upon the results of the underlying soil analytical results as detailed further in this document.

The target level is ≤ 1.0 mg/kg PCBs, which meets cleanup standards of both 40 CFR 761.61(a) Self Implementing On-Site Cleanup and Disposal of PCB Remediation Waste as well as the 1.55 mg/kg HSRA Cleanup Standard for residential properties. Georgia Power submitted a Request for Expedited Approval to USEPA on July 3, 2017 and obtained approval on July 24, 2017. A copy of the USEPA correspondence is included in Appendix B, USEPA Correspondence. The Georgia Environmental Protection Division (EPD) was notified verbally on June 27, 2017 of the presence of PCBs in soil above regulatory limits that were not remediated within 30 days of discovery, as required by the Georgia Hazardous Site Response Act (HSRA). A copy of this report will be provided to EPD as required by the HSRA program.

Section 2

Site Investigation Sampling Methodology

This section outlines sample location criteria, sample collection procedures, and analyses performed for the PCB investigation of the Switchyard.

The site assessment procedures implemented during this investigation reflect Georgia Power's standard methodology for assessing Georgia Power substations at which no historical data exist to confirm or refute whether a release of PCBs from electrical equipment containing dielectric fluid has occurred. It is the intent of the sampling methodology to identify whether a PCB release occurred on the property. The sampling methodology incorporates both a biased and a non-biased sampling approach. The biased sample location methodology uses site knowledge (i.e. knowledge of the past or present location of electrical equipment containing dielectric fluid) to select soil sampling locations. The non-biased sample location methodology incorporates a grid-based approach to ensure that a sufficient number of soil samples are collected to adequately characterize a potential PCB site.

2.1 Site Investigation Sampling Methodology

The site was inspected for visible oil-stained soils and no oil stains were observed.

The former switchyard site is approximately 12,000-square-feet. Non-biased sampling consisted of developing a 30-ft x 20-ft grid with sample locations at each node. The grid axis was aligned with the northwest corner (sample location F1) of the fence line as it existed during site operations (See Figure 3, PCB Sampling Plan and Results). The samples on the perimeter of the grid area were labeled "F#". Non-biased samples in the interior of the grid were labeled "A#". Biased samples collected on the perimeter of the concrete pads that supported oil-filled equipment were labeled "CP#". A total of forty-three soil samples and three duplicate samples were collected during the initial investigation. Upon receiving analytical results above the target level, thirty-nine additional samples were collected to determine the horizontal extent of PCB-contaminated soils. These samples were labeled D#. Nineteen vertical depth samples was collected at sample locations found to be above the target level. These samples were labeled with the original ID followed by the depth in feet, for example F1@2-ft.

On June 2, 2016 Georgia Power collected nine concrete samples from the surface of the concrete pads known to support oil-filled equipment (See Figure 4, Concrete PCB Sampling Plan and Results) prior to switchyard demolition and removal of the concrete. These samples were labeled "CP#" during field collection, and have been labeled "2016-CP#" in tables and on figures for clarity.

2.1.1 Sample Collection, Identification and Preservation

Initially, soil samples were collected as surface soil samples from the upper six inches of soil (excluding surface gravel, if present). Soil samples collected for PCB analyses were placed into laboratory-provided, four-ounce glass sampling jars sealed with a Teflon-lined lid. The samples were preserved with ice at a maximum temperature of 6°C for delivery to AES Laboratories of Atlanta, GA.

Samples were not collected from locations A6 and F22. Refusal was met at these sample locations due to presence of debris at the surface that would not allow sample collection.

2.1.2 Laboratory Analysis and Reporting

All samples were analyzed for PCBs using EPA SW-846 Method 8082. Sample concentrations were reported on a dry-weight basis. For comparison purposes to regulatory target levels, the analytical summary tables present the results in milligrams per kilogram (mg/kg). Copies of original laboratory reports are included in Appendix C of this document.

2.1.3 QA/QC Sample Collection (Duplicates)

Quality Assurance/Quality Control (QA/QC) samples in the form of field duplicates were collected at a rate of at least one duplicate for every 20th soil sample. Three QA/QC field duplicate were collected and analyzed.

Section 3

Investigation Results

Using the methodology described in Section 2, GPC and SBX personnel performed an investigation of the Switchyard on June 6, 2017. Sample locations and results are shown in Figure 3, PCB Sampling Plan and Results. A total of forty-three soil samples and three duplicate samples were collected on June 2017. Nineteen vertical and thirty-nine horizontal delineation samples were also collected. As shown in Figure 4, Georgia Power collected nine composite concrete samples in the switchyard prior to demolition. A summary of the analytical results are presented in Table 1, Soil Sample Analytical Results Summary-PCBs, Table 2, Vertical and Horizontal Delineation Soil Sample Analytical Results Summary-PCBs and Table 3, Concrete Sample Analytical Results Summary-PCBs. The laboratory analytical reports are included in Appendix C, Lab Analytical Reports and Chain of Custody Records.

Sample locations F1, F2, F9, F11, F12, F14, F17, F19, F24, CP5, CP6, CP9, CP10, CP11, CP12, A5, A7, A8, and A9, were found to have a concentration above the target level. Additional samples were collected to delineate the extent of soils containing PCBs above the target level. Sample locations A8, D23, and D29 were greater than 50 mg/kg, thus soils were further delineated to determine the extent of material requiring disposal at a Subtitle C landfill.

Section 4

Remedial Action

4.1 Waste Characterization and Determination of Cleanup Extent

Beginning on July 10, 2017, soil remediation commenced and was completed on August 04, 2017. The remediation consisted of removing delineated PCB-impacted soils from the property for off-site disposal. The removal of PCB-impacted soil was performed with standard earth-moving equipment. Each impacted area was excavated to the necessary depth as determined by delineation samples.

The remediation objectives were to:

- Segregate and remove all soil with PCB concentrations equal to or greater than 50 mg/kg for transport to and disposal at a TSCA-approved Subtitle C hazardous waste landfill.
- Segregate and remove all soil with PCB concentrations greater than 1.0 mg/kg but less than 50 mg/kg for transport to and disposal at a Subtitle D, non-hazardous waste landfill.
- Verify removal of all soil impacted with PCB concentrations greater than or equal to 1.0 mg/kg with confirmatory sampling.

Figure 5, Excavation Plan, details the location where each phase of remedial work was required.

Excavated material with a PCB concentration greater than 1.0 mg/kg but less than 50 mg/kg was transported and disposed at Waste Management's Subtitle D Superior Landfill facility in Savannah, GA. All excavated material with a PCB concentration greater than or equal to 50 mg/kg was transported and disposed at the TSCA-approved Subtitle C hazardous waste landfill operated by Chemical Waste Management located near Emelle, Alabama.

A total of 2309.76 tons of non-TSCA soil was transported to Waste Management's Superior Landfill in Savannah, Georgia and a total of 129.75 tons of soil was transported to Chemical Waste Management's TSCA-approved facility near Emelle, Alabama. A total of 0.288 acres were remediated to a varying depth of 2-ft to 4-ft below ground surface.

4.2 Waste Manifests

A summary of the material disposal is presented in Table 4, Non-Hazardous Landfill Waste Manifest Log and Table 5, Hazardous Landfill Waste Manifest Log. A copy of the waste manifest are presented in Appendix D, Waste Disposal Documents.

Table 4
Non-Hazardous Waste Manifest Log

4.3 Confirmation Sampling

Soil confirmation sample aliquots were collected on the excavation floor and the sidewalls in accordance with 40CFR 761.283 and 40CFR 761.289. A 5-foot by 5-foot grid was laid out over each area and grab samples (aliquots) were collected at each grid node from the excavation surface including walls. In each area, the individual aliquots were composited into one sample by thoroughly mixing the soil. Each composite sample consisted of no more than nine aliquots. The composite samples were analyzed for total PCBs by EPA SW-846 Method 8082. If the analytical results of a confirmation sample were found to be above the target concentration level, the excavation area where the sample was collected was advanced 2-ft deep. Three excavation areas were advanced 2-ft deep from the bottom of the excavation. These areas are shown in Figure 6, Confirmation Sampling Plan and Results.

The confirmation sample analytical results indicated that all soils with PCB concentrations greater than a regulatory limit had been removed. The location and analytical results of the confirmation samples are shown in Figure 6, Confirmation Sampling Plan and Results at the end of this section. A summary of the confirmation samples collected and the results are presented in Table 6. Copies of the analytical results are presented in Appendix C, Laboratory Analytical Reports and Chain of Custody Records.

Section 5

Summary & Conclusions

40 CFR Part 761 (PCBs)

The site assessment indicates that no PCBs remain in the soil at concentrations above the 1.0 mg/kg limit required for decontaminating spills in areas with non-restricted access.

Georgia Hazardous Site Response Act (HSRA)

As stated above, no PCBs remain in the soil at a concentration above 1.0 mg/kg, which is below the HSRA soil notification concentration of 1.55 mg/kg.

Site Demolition & Restoration

A total of one hundred forty-nine loads of soil were removed and disposed of at the Waste Management's Superior Landfill located in Savannah, Georgia. A total of nine load of soil were removed and disposed of at Chemical Waste Management's TSCA-approved facility near Emelle, Alabama. The disturbed area was restored to approximately original grade.

**RE: Request for Expedited Approval under 40 CFR 761.61(a)
Cleanup for Georgia Power Company's Plant Kraft Low-Voltage Switchyard
Port Wentworth, Chatham County, Georgia**

Dear Mr. Feely:

Georgia Power Company (Georgia Power) is requesting that USEPA expedite approval to proceed under the 40 CFR 761.61(a) Toxic Substances Control Act (TSCA) protocol for cleanup of an area at Georgia Power's Plant Kraft low-voltage switchyard in Port Wentworth, Georgia. During the initial retirement investigation of the switchyard, results indicated polychlorinated biphenyl (PCB) impacts to soil. Following the receipt of these results, a remediation plan was prepared.

The planned remedial strategy is to excavate and handle the soil containing PCBs above 50 milligrams per kilogram (mg/kg) as TSCA waste for disposal at an approved Subtitle C landfill. In addition, soils containing non-TSCA PCB concentrations between 1 ppm and 49 ppm will be excavated and disposed of in a Subtitle D landfill. Attached please find a site-specific notification form and a figure showing both the TSCA and non-TSCA areas to be excavated.

Following excavation of the TSCA and non-TSCA material, confirmation samples will be taken in accordance with 40 CFR 761.280 Subpart O to confirm that remaining soils do not contain PCBs greater than 1 mg/kg. No further action will be needed as all impacted waste will have been removed, and no institutional controls such as surface caps, fences or deed notices will be required.

Upon completion of this project, Georgia Power will submit to USEPA a remediation summary report for the work conducted at the site. The summary report will include: 1) a

complete narrative of site activities; 2) tabular summaries of assessment and verification sampling analytical results; 3) a figure showing the excavation area and depth, and; 4) copies of disposal manifests.

Georgia Power appreciates your attention to this matter. Should you have any questions, comments, or require additional information, please contact me at (770) 601-4260 or Lea Millet at (404) 506-6235.

Sincerely,

for 
Brett Mitchell
Environmental Affairs Manager

Re: Approval for 40 CFR § 761.61(a) Cleanup
Georgia Power Company
Plant Kraft Switchyard, Port Wentworth, Chatham County, Georgia

Dear Mr. Mitchell:

The U.S. Environmental Protection Agency Region 4 is in receipt of your July 3, 2017, request to conduct an expedited review of the 40 CFR § 761.61(a) self-implementing polychlorinated biphenyl (PCB) cleanup plan for the Georgia Power Company's Plant Kraft Switchyard in Chatham County, Georgia. The notification package follows the standardized 40 CFR § 761.61(a) self-implementing notification and cleanup protocol approved by the EPA on August 6, 1999.

The Georgia Power Company (GPC) has proposed to remove PCB-impacted soil from the areas identified in Figure 1 of the notification package. All soil containing PCBs at concentrations greater than one part per million (ppm) will be removed. Material containing PCBs at concentrations of 50 ppm or greater will be removed from the site and disposed at a Resource Conservation and Recovery Act (RCRA) Subtitle C or Toxic Substances Control Act approved landfill. Material containing PCBs at concentrations greater than one ppm but less than 50 ppm will be removed from the site and disposed at a RCRA Subtitle D landfill.

With the exception of characterization sample spacing, the cleanup plan satisfies 40 CFR § 761.61(a) requirements. The EPA finds that the soil excavation boundaries, based on the GPC's sampling protocol, are conservative and should not result in improper disposal of PCB remediation waste nor pose an unreasonable risk of injury to health or the environment. The EPA hereby approves the plan pursuant to 40 CFR § 761.61(a)(3)(ii) and 40 CFR § 761.61(c)(2). The GPC may proceed with the Plant Kraft Switchyard PCB cleanup subject to the following conditions:

1. The "cleanup site" covered by this approval includes soil within the property boundaries of the Plant Kraft Switchyard as depicted in Figure 1 of the notification package.

2. The cleanup level for bulk PCB remediation waste (soil) shall be the *high occupancy areas* $\leq$ one ppm level in accordance with requirements at 40 CFR § 761.61(a)(4).
3. Post-cleanup verification soil samples shall be collected and analyzed in accordance with the requirements of 40 CFR § 761.61(a)(6) on five-foot grid centers within the excavation areas depicted in Figure 1 of the notification package.
4. The GPC shall submit a final report to the EPA within 60 days of completion of all activities described under this approval. At a minimum the report shall include a short narrative of the project activities, tabular summaries of characterization and confirmation sampling analytical results, site maps depicting confirmation sample locations and final PCB concentrations, and an estimate of the total acres remediated. The report shall be submitted to the EPA in an electronic format (e.g., compact or digital video disc).
5. The GPC shall comply with the recordkeeping requirements specified at 40 CFR § 761.61(a)(9) for activities conducted in accordance with this approval.
6. Once cleanup is underway, any change to the plan must be submitted to the EPA for approval prior to the implementation of the change.

Should you have any questions concerning this matter, please contact Ken Feely of the Materials and Waste Management Branch at (404) 562-8512.

Sincerely,

Meredith C. Anderson, Acting Chief
Materials and Waste Management Branch
Resource Conservation and Restoration Division

RE: Plant Kraft Switchyard

Dear Nick Heuman:

Order No: 1706616

Analytical Environmental Services, Inc. received 46 samples on 6/7/2017 2:22:00 PM
for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.

AES's accreditations are as follows:

-NELAC/Florida State Laboratory ID E87582 for analysis of Non-Potable Water, Solid & Chemical Materials, and Drinking Water Microbiology, effective 07/01/16-06/30/17.

State of Georgia, Department of Natural Resources ID #800 for analysis of Drinking Water Metals, effective 07/01/16-06/30/17 and Total Coliforms and E. coli, effective 04/25/17-04/24/20.

-NELAC/Louisiana Agency Interest No. 100818 for or analysis of Non-Potable Water and Solid & Chemical Materials, effective 07/01/16-06/30/17.

-AIHA-LAP, LLC Laboratory ID: 100671 for Industrial Hygiene samples (Organics, Metals, PCM Asbestos, Gravimetric), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) Direct Examination, effective until 09/01/17.

These results relate only to the items tested. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

Sincerely,

Tyrel Heckendorf
Project Manager

Case Narrative

Per remarks "F22 was not collected due to obstruction." Empty sample jar received and not listed on the chain of custody.

Samples A1 through A9, as well as samples DUP-1, DUP-2, DUP-3 were received but not listed on the chain of custody. Per Alex Silva via phone on 6/7/17, these samples were logged in for PCB analysis. The chain of custody containing these samples was received 6/8/2017 and included in the final report.

PCB Analysis by Method 8082:

Due to sample matrix, sample 1706616-029A, -019A, -017A, -032A required dilution during preparation and/or analysis resulting in elevated reporting limits.

SAMPLE/COOLER RECEIPT CHECKLIST

1. Client Name: _____

AES Work Order Number: _____

2. Carrier: FedEx ☐ UPS ☐ USPS ☐ Client ☐ Courier ☐ Other _____

	Yes	No	N/A	Details	Comments
3. Shipping container/cooler received in good condition?				damaged ☐ leaking ☐ other ☐	
4. Custody seals present on shipping container?					
5. Custody seals intact on shipping container?					
6. Temperature blanks present?					
7. Cooler temperature(s) within limits of 0-6°C? [See item 13 and 14 for temperature recordings.]				Cooling initiated for recently collected samples / ice present ☐	
8. Chain of Custody (COC) present?					
9. Chain of Custody signed, dated, and timed when relinquished and received?					
10. Sampler name and/or signature on COC?					
11. Were all samples received within holding time?					
12. TAT marked on the COC?				If no TAT indicated, proceeded with standard TAT per Terms & Conditions. ☐	

13. Cooler 1 Temperature _____ °C Cooler 2 Temperature _____ °C Cooler 3 Temperature _____ °C Cooler 4 Temperature _____ °C
 Cooler 5 Temperature _____ °C Cooler 6 Temperature _____ °C Cooler 7 Temperature _____ °C Cooler 8 Temperature _____ °C

15. Comments: _____

I certify that I have completed sections 1-15 (dated initials). _____

	Yes	No	N/A	Details	Comments
16. Were sample containers intact upon receipt?					
17. Custody seals present on sample containers?					
18. Custody seals intact on sample containers?					
19. Do sample container labels match the COC?				incomplete info ☐ illegible ☐ no label ☐ other ☐	
20. Are analyses requested indicated on the COC?					
21. Were all of the samples listed on the COC received?				samples received but not listed on COC ☐ samples listed on COC not received ☐	
22. Was the sample collection date/time noted?					
23. Did we receive sufficient sample volume for indicated analyses?					
24. Were samples received in appropriate containers?					
25. Were VOA samples received without headspace (< 1/4" bubble)?					
26. Were trip blanks submitted?				listed on COC ☐ not listed on COC ☐	

27. Comments: _____

I certify that I have completed sections 16-27 (dated initials). _____

	Yes	No	N/A	Details	Comments
28. Have containers needing chemical preservation been checked?					
29. Containers meet preservation guidelines?					
30. Was pH adjusted?					

I certify that I have completed sections 28-30 (dated initials). _____

ANALYTICAL ENVIRONMENTAL SERVICES, INC.

June 22, 2017

Nick Heuman
Georgia Power Company

241 Ralph McGill Blvd.
Atlanta GA 30308

RE: Plant Kraft (low voltage switch yard)

Dear Nick Heuman:

Order No: 1706H69

Analytical Environmental Services, Inc. received 13 samples on 6/20/2017 10:20:00 AM
for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.

AES's accreditations are as follows:

-NELAC/Florida State Laboratory ID E87582 for analysis of Non-Potable Water, Solid & Chemical Materials, and Drinking Water Microbiology, effective 07/01/16-06/30/17.

State of Georgia, Department of Natural Resources ID #800 for analysis of Drinking Water Metals, effective 07/01/16-06/30/17 and Total Coliforms and E. coli, effective 04/25/17-04/24/20.

-NELAC/Louisiana Agency Interest No. 100818 for or analysis of Non-Potable Water and Solid & Chemical Materials, effective 07/01/16-06/30/17.

-AIHA-LAP, LLC Laboratory ID: 100671 for Industrial Hygiene samples (Organics, Metals, PCM Asbestos, Gravimetric), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) Direct Examination, effective until 09/01/17.

These results relate only to the items tested. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

Sincerely,

Tyrel Heckendorf
Project Manager

SAMPLE/COOLER RECEIPT CHECKLIST

1. Client Name: _____

AES Work Order Number: _____

2. Carrier: FedEx ☐ UPS ☐ USPS ☐ Client ☐ Courier ☐ Other _____

	Yes	No	N/A	Details	Comments
3. Shipping container/cooler received in good condition?				damaged ☐ leaking ☐ other ☐	
4. Custody seals present on shipping container?					
5. Custody seals intact on shipping container?					
6. Temperature blanks present?					
7. Cooler temperature(s) within limits of 0-6°C? [See item 13 and 14 for temperature recordings.]				Cooling initiated for recently collected samples / ice present ☐	
8. Chain of Custody (COC) present?					
9. Chain of Custody signed, dated, and timed when relinquished and received?					
10. Sampler name and/or signature on COC?					
11. Were all samples received within holding time?					
12. TAT marked on the COC?				If no TAT indicated, proceeded with standard TAT per Terms & Conditions. ☐	

13. Cooler 1 Temperature _____ °C Cooler 2 Temperature _____ °C Cooler 3 Temperature _____ °C Cooler 4 Temperature _____ °C
 Cooler 5 Temperature _____ °C Cooler 6 Temperature _____ °C Cooler 7 Temperature _____ °C Cooler 8 Temperature _____ °C

15. Comments: _____

I certify that I have completed sections 1-15 (dated initials). _____

	Yes	No	N/A	Details	Comments
16. Were sample containers intact upon receipt?					
17. Custody seals present on sample containers?					
18. Custody seals intact on sample containers?					
19. Do sample container labels match the COC?				incomplete info ☐ illegible ☐ no label ☐ other ☐	
20. Are analyses requested indicated on the COC?					
21. Were all of the samples listed on the COC received?				samples received but not listed on COC ☐ samples listed on COC not received ☐	
22. Was the sample collection date/time noted?					
23. Did we receive sufficient sample volume for indicated analyses?					
24. Were samples received in appropriate containers?					
25. Were VOA samples received without headspace (< 1/4" bubble)?					
26. Were trip blanks submitted?				listed on COC ☐ not listed on COC ☐	

27. Comments: _____

ANALYTICAL ENVIRONMENTAL SERVICES, INC.

June 21, 2017

Nick Heuman
Georgia Power Company

241 Ralph McGill Blvd.
Atlanta GA 30308

RE: Plant Kraft Switchyard

Dear Nick Heuman:

Order No: 1706F16

Analytical Environmental Services, Inc. received 45 samples on 6/16/2017 8:44:00 AM
for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.

AES's accreditations are as follows:

-NELAC/Florida State Laboratory ID E87582 for analysis of Non-Potable Water, Solid & Chemical Materials, and Drinking Water Microbiology, effective 07/01/16-06/30/17.

State of Georgia, Department of Natural Resources ID #800 for analysis of Drinking Water Metals, effective 07/01/16-06/30/17 and Total Coliforms and E. coli, effective 04/25/17-04/24/20.

-NELAC/Louisiana Agency Interest No. 100818 for or analysis of Non-Potable Water and Solid & Chemical Materials, effective 07/01/16-06/30/17.

-AIHA-LAP, LLC Laboratory ID: 100671 for Industrial Hygiene samples (Organics, Metals, PCM Asbestos, Gravimetric), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) Direct Examination, effective until 09/01/17.

These results relate only to the items tested. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

Sincerely,

Tyrel Heckendorf
Project Manager

Case Narrative

Sample Receiving Nonconformance:

Samples 1706F16-040A through 1706F16-053A were listed on the Chain of Custody but not received. Samples were placed on hold.

Samples "CP6 @ 2FT" (received empty), "CP7 @ 2FT", "CP8 @ 2FT", and "CP9 @ 2FT" (received empty) were received but not listed on the COC. Samples were logged in for analysis with the information listed on the container, and the two samples received empty were placed on hold.

Per Alex Silva via phone, samples were logged in for a 3-day TAT.

SAMPLE/COOLER RECEIPT CHECKLIST

1. Client Name: _____

AES Work Order Number: _____

2. Carrier: FedEx ☐ UPS ☐ USPS ☐ Client ☐ Courier ☐ Other _____

	Yes	No	N/A	Details	Comments
3. Shipping container/cooler received in good condition?				damaged ☐ leaking ☐ other ☐	
4. Custody seals present on shipping container?					
5. Custody seals intact on shipping container?					
6. Temperature blanks present?					
7. Cooler temperature(s) within limits of 0-6°C? [See item 13 and 14 for temperature recordings.]				Cooling initiated for recently collected samples / ice present ☐	
8. Chain of Custody (COC) present?					
9. Chain of Custody signed, dated, and timed when relinquished and received?					
10. Sampler name and/or signature on COC?					
11. Were all samples received within holding time?					
12. TAT marked on the COC?				If no TAT indicated, proceeded with standard TAT per Terms & Conditions. ☐	

13. Cooler 1 Temperature _____ °C Cooler 2 Temperature _____ °C Cooler 3 Temperature _____ °C Cooler 4 Temperature _____ °C
 Cooler 5 Temperature _____ °C Cooler 6 Temperature _____ °C Cooler 7 Temperature _____ °C Cooler 8 Temperature _____ °C

15. Comments: _____

I certify that I have completed sections 1-15 (dated initials). _____

	Yes	No	N/A	Details	Comments
16. Were sample containers intact upon receipt?					
17. Custody seals present on sample containers?					
18. Custody seals intact on sample containers?					
19. Do sample container labels match the COC?				incomplete info ☐ illegible ☐ no label ☐ other ☐	
20. Are analyses requested indicated on the COC?					
21. Were all of the samples listed on the COC received?				samples received but not listed on COC ☐ samples listed on COC not received ☐	
22. Was the sample collection date/time noted?					
23. Did we receive sufficient sample volume for indicated analyses?					
24. Were samples received in appropriate containers?					
25. Were VOA samples received without headspace (< 1/4" bubble)?					
26. Were trip blanks submitted?				listed on COC ☐ not listed on COC ☐	

27. Comments: _____

I certify that I have completed sections 16-27 (dated initials). _____

	Yes	No	N/A	Details	Comments
28. Have containers needing chemical preservation been checked?					
29. Containers meet preservation guidelines?					
30. Was pH adjusted?					

I certify that I have completed sections 28-30 (dated initials). _____

RE: Kraft SS

Dear Chuck Chatham:

Order No: 1606478

Analytical Environmental Services, Inc. received 9 samples on 6/4/2016 10:04:00 AM for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.

AES's accreditations are as follows:

- NELAC/Florida State Laboratory ID E87582 for analysis of Non-Potable Water, Solid & Chemical Materials, and Drinking Water Microbiology, effective 07/01/15-06/30/16.
- NELAC/Louisiana Agency Interest No. 100818 for or analysis of Non-Potable Water and Solid & Chemical Materials, effective 07/01/15-06/30/16.
- NELAC/Texas Certificate No. T104704509-16-6 for or analysis of Non-Potable Water and Solid & Chemical Materials, effective 03/01/16-02/28/17.
- AIHA-LAP, LLC Laboratory ID: 100671 for Industrial Hygiene samples (Organics, Inorganics), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) Direct Examination, effective until 09/01/17.

Sample/Cooler Receipt Checklist

Client Georgia Power

Work Order Number 1606478

Checklist completed by Pam Masoudi 6/04/16
Signature Date

Carrier name: FedEx ☐ UPS ☐ Courier ☐ Client ☒ US Mail ☐ Other ☐

Shipping container/cooler in good condition? Yes ☒ No ☐ Not Present ☐

Custody seals intact on shipping container/cooler? Yes ☐ No ☐ Not Present ☒

Custody seals intact on sample bottles? Yes ☐ No ☐ Not Present ☒

Container/Temp Blank temperature in compliance? ($0^{\circ} \leq 6^{\circ}\text{C}$) * Yes ☒ No ☐

Cooler #1 0.30 Cooler #2 ☐ Cooler #3 ☐ Cooler #4 ☐ Cooler #5 ☐ Cooler #6 ☐

Chain of custody present? Yes ☒ No ☐

Chain of custody signed when relinquished and received? Yes ☒ No ☐

Chain of custody agrees with sample labels? Yes ☒ No ☐

Samples in proper container/bottle? Yes ☒ No ☐

Sample containers intact? Yes ☒ No ☐

Sufficient sample volume for indicated test? Yes ☒ No ☐

All samples received within holding time? Yes ☒ No ☐

Was TAT marked on the COC? Yes ☒ No ☐

Proceed with Standard TAT as per project history? Yes ☐ No ☐ Not Applicable ☒

Water - VOA vials have zero headspace? No VOA vials submitted ☒ Yes ☐ No ☐

Water - pH acceptable upon receipt? Yes ☐ No ☐ Not Applicable ☒

Adjusted? ☐ Checked by ☐

Sample Condition: Good ☒ Other(Explain) ☐

(For diffusive samples or AIHA lead) Is a known blank included? Yes ☐ No ☒

See Case Narrative for resolution of the Non-Conformance.

* Samples do not have to comply with the given range for certain parameters.

ANALYTICAL ENVIRONMENTAL SERVICES, INC.

July 28, 2017

Nick Heuman
Georgia Power Company

241 Ralph McGill Blvd.
Atlanta GA 30308

RE: Plant Kraft Switchyard

Dear Nick Heuman:

Order No: 1707K97

Analytical Environmental Services, Inc. received 55 samples on 7/26/2017 9:10:00 AM
for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.

AES's accreditations are as follows:

-NELAC/Florida State Laboratory ID E87582 for analysis of Non-Potable Water, Solid & Chemical Materials, and Drinking Water Microbiology, effective 07/01/17-06/30/18.

State of Georgia, Department of Natural Resources ID #800 for analysis of Drinking Water Metals, effective 07/01/17-06/30/18 and Total Coliforms and E. coli, effective 04/25/17-04/24/20.

-NELAC/Louisiana Agency Interest No. 100818 for or analysis of Non-Potable Water and Solid & Chemical Materials, effective 07/01/17-06/30/18.

-AIHA-LAP, LLC Laboratory ID: 100671 for Industrial Hygiene samples (Organics, Metals, PCM Asbestos, Gravimetric), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) Direct Examination, effective until 09/01/17.

These results relate only to the items tested. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

Sincerely,

Tyrel Heckendorf
Project Manager

3. Shipping container/cooler received in good condition?	☒	☐	☐	damaged ☐ leaking ☐ other ☐	
4. Custody seals present on shipping container?	☐	☒	☐		
5. Custody seals intact on shipping container?	☐	☐	☒		
6. Temperature blanks present?	☒	☐	☐		
7. Cooler temperature(s) within limits of 0-6°C? [See item 13 and 14 for temperature recordings.]	☒	☐	☐	Cooling initiated for recently collected samples / ice present ☐	
8. Chain of Custody (COC) present?	☒	☐	☐		
9. Chain of Custody signed, dated, and timed when relinquished and received?	☒	☐	☐		
10. Sampler name and/or signature on COC?	☒	☐	☐		
11. Were all samples received within holding time?	☒	☐	☐		
12. TAT marked on the COC?	☒	☐	☐	If no TAT indicated, proceeded with standard TAT per Terms & Conditions. ☐	

13. Cooler 1 Temperature 5.5 °C Cooler 2 Temperature _____ °C Cooler 3 Temperature _____ °C Cooler 4 Temperature _____ °C

14. Cooler 5 Temperature _____ °C Cooler 6 Temperature _____ °C Cooler 7 Temperature _____ °C Cooler 8 Temperature _____ °C

15. Comments: _____

I certify that I have completed sections 1-15 (dated initials).

PM 7/26/17

	Yes	No	N/A	Details	Comments
16. Were sample containers intact upon receipt?	☒	☐	☐		
17. Custody seals present on sample containers?	☐	☒	☐		
18. Custody seals intact on sample containers?	☐	☐	☒		
19. Do sample container labels match the COC?	☒	☐	☐	incomplete info ☐ illegible ☐ no label ☐ other ☐	
20. Are analyses requested indicated on the COC?	☒	☐	☐		
21. Were all of the samples listed on the COC received?	☒	☐	☐	samples received but not listed on COC ☐ samples listed on COC not received ☐	
22. Was the sample collection date/time noted?	☒	☐	☐		
23. Did we receive sufficient sample volume for indicated analyses?	☒	☐	☐		
24. Were samples received in appropriate containers?	☒	☐	☐		
25. Were VOA samples received without headspace (< 1/4" bubble)?	☒	☐	☒		
26. Were trip blanks submitted?	☐	☐	☒	listed on COC ☐ not listed on COC ☐	

27. Comments: _____

I certify that I have completed sections 16-27 (dated initials).

PM 7/26/17

This section only applies to samples where pH can be checked at Sample Receipt.

	Yes	No	N/A	Details	Comments
28. Have containers needing chemical preservation been checked? *	☐	☐	☒		
29. Containers meet preservation guidelines?	☐	☐	☒		
30. Was pH adjusted at Sample Receipt?	☐	☐	☒		

* Note: Certain analyses require chemical preservation but must be checked in the laboratory and not upon Sample Receipt such as Coliforms, VOCs and Oil & Grease/TPH.

I certify that I have completed sections 28-30 (dated initials).

ANALYTICAL ENVIRONMENTAL SERVICES, INC.

August 02, 2017

Leah Millet
Georgia Power Company

241 Ralph McGill Blvd.
Atlanta GA 30308

RE: Plant Kraft Low Voltage Switchyard

Dear Leah Millet:

Order No: 1708034

Analytical Environmental Services, Inc. received 3 samples on 8/1/2017 10:15:00 AM
for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.

AES's accreditations are as follows:

-NELAC/Florida State Laboratory ID E87582 for analysis of Non-Potable Water, Solid & Chemical Materials, and Drinking Water Microbiology, effective 07/01/17-06/30/18.

State of Georgia, Department of Natural Resources ID #800 for analysis of Drinking Water Metals, effective 07/01/17-06/30/18 and Total Coliforms and E. coli, effective 04/25/17-04/24/20.

-NELAC/Louisiana Agency Interest No. 100818 for or analysis of Non-Potable Water and Solid & Chemical Materials, effective 07/01/17-06/30/18.

-AIHA-LAP, LLC Laboratory ID: 100671 for Industrial Hygiene samples (Organics, Metals, PCM Asbestos, Gravimetric), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) Direct Examination, effective until 09/01/17.

These results relate only to the items tested. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

Sincerely,

Tyrel Heckendorf
Project Manager

Case Narrative

Sample Receiving Nonconformance:

Samples in WO 1708034 were received at 17.8°C, outside required temperature range of 0-6°C. All ice had melted. Laboratory proceeded with analysis per John Burgess via phone on 8/1/2017.

CERTIFICATE OF DISPOSAL

Chemical Waste Management, Inc. (ALD000622464) has received PCB material from
GEORGIA POWER CO

as described on Hazardous Waste Manifest Number 003452306GBF-1

Waste Management, Inc. hereby certifies that the above described material (excluding PCB liquids, if applicable) was
landfilled on the dates shown below, in compliance with State and Federal Regulations.

Under civil and criminal penalties of law for the making or submission of false or fraudulent statements or
representation (18 U.S.C. 1001 and 15 U.S.C. 2615), I certify that the information contained in or accompanying this
document is true, accurate and complete. As to the identified section(s) of this document for which I cannot personally
verify truth and accuracy, I certify as the company official having supervisory responsibility for the persons who, acting
under my direct instructions, made the verification that this information is true, accurate and complete.

Chemical Waste Management, Inc. (ALD000622464) has received PCB material from
GEORGIA POWER CO

as described on Hazardous Waste Manifest Number 003452312GBF-1

Waste Management, Inc. hereby certifies that the above described material (excluding PCB liquids, if applicable) was
landfilled on the dates shown below, in compliance with State and Federal Regulations.

Under civil and criminal penalties of law for the making or submission of false or fraudulent statements or
representation (18 U.S.C. 1001 and 15 U.S.C. 2615), I certify that the information contained in or accompanying this
document is true, accurate and complete. As to the identified section(s) of this document for which I cannot personally
verify truth and accuracy, I certify as the company official having supervisory responsibility for the persons who, acting
under my direct instructions, made the verification that this information is true, accurate and complete.
