

**INITIAL HAZARD POTENTIAL ASSESSMENT  
40 C.F.R. PART 257.73  
PLANT MCDONOUGH ASH POND 2 (AP-2)  
GEORGIA POWER COMPANY**

EPA's "Disposal of Coal Combustion Residuals from Electric Utilities" Final Rule (40 C.F.R. Part 257 and Part 261) subsection §257.73(a)(2) requires the owner or operator of an existing CCR surface impoundment to conduct periodic hazard potential classification assessments. The owner or operator must document the hazard potential of each surface impoundment as a high hazard potential CCR unit, a significant hazard potential CCR unit or a low hazard potential CCR unit.

Plant McDonough AP-2 has undergone CCR removal in accordance with §257.102(c), no longer impounds free water nor receives CCR, and is in the process of obtaining a solid waste permit under the Georgia Rules for Solid Waste Management, 391-3-4-.10. As such, McDonough AP-2 no longer meets the definition of a CCR Surface Impoundment.

I hereby certify that the documentation above is accurate based on current available information.
