

Simple Solar Large Volume and Special Event Purchase Options

Becoming a participant in Georgia Power's Simple Solar program is a great way to show customers you're committed to the environment. By investing in solar Renewable Energy Credits (RECs), you are helping the advancement of electricity generated from environmentally friendly solar sources. Most importantly, the use of solar RECs helps the environment and growth of solar energy in Georgia.

Further Benefits of Large Volume and Special Event Simple Solar Purchases:

- Georgia Power's Simple Solar program makes it easy for your company to support the use and advancement of solar.
- Enhance the image of your company or event. Simple Solar is a valuable, high-profile addition to your company or event record as a good corporate citizen.
- Increased positive exposure. Georgia Power helps ensure that prospective and existing customers, and the public at large, know your company is a Simple Solar participant.
- Community impact. Since Simple Solar sources have a reduced impact on the environment, they help improve our communities.

Large Volume Purchase Option

Georgia Power recognizes these customers as the largest participants in our Simple Solar program.

The Large Volume Purchase Option is available to customers who purchase a monthly minimum of 50,000 kWhs of RECs and who contract with the company for a fixed quantity and term. The additional Simple Solar charge for the Large Volume Purchase Option shall be:

The first 50,000 kWhs, per month	1¢ per kWh
The next 100,000 kWhs, per month	.8¢ per kWh
The next 200,000 kWhs, per month	.6¢ per kWh
All other exceeding kWhs, per month	.5¢ per kWh

Special Event Purchase Option

A special event is a one-time occurrence and purchase. Customers who wish to participate in Simple Solar to accompany the electricity usage for their event may purchase through this option. A special event refers to a non-permanent assembly, e.g., a conference, concert, sporting event, etc., and shall not be used to procure renewable energy for permanent facilities. The support of environmentally friendly energy sources sends a powerful message about the commitment to the environment from event organizers and participants.
