

Terms & Conditions

Plug-In Electric Vehicle Tariff

- By choosing to participate in the residential time-of-use Plug-In Electric Vehicle rate plan, you agree to pay the monthly Plug-In Electric Vehicle kWh usage amount for electric service to the designated residence shown on the reverse side for at least twelve months, beginning with the first bill rendered on the Plug-In Electric Vehicle rate.
- These Plug-In Electric Vehicle terms apply only for electric service to the designated account(s) and address. If you transfer service to another address, you will need to reapply for the Plug-In Electric Vehicle rate.
- Your Plug-In Electric Vehicle offer does not include fuel, taxes, and other charges, nor does it include Georgia Power security lights, or other Georgia Power products and services should you have any.
- Georgia Power can only offer the residential time-of-use Plug-In Electric Vehicle rate to customers who have had the AMI/smart meter installed on their residence. This meter replacement program is currently underway on a statewide basis. No timeline for a specific meter replacement can be guaranteed for any individual residence.
- Georgia Power offers the Plug-In Electric Vehicle rate plan pursuant to the current residential rate filing, which is on file with the Georgia Public Service Commission.
- This rate is not available to customers currently billed on Georgia Power's FlatBill® program.
